

Inclyno No. 2 Sieve Shaker

SV020

Heavy duty, floor standing shaker for 200mm & 300mm diameter sieves with a unique sieving action.

The sieve table of the Inclyno is always inclined to the axis of the machine. The table does not rotate but moves in a gyratory motion at 2rpm. This gyratory movement spreads the material over the entire surface of the mesh of each sieve but does not throw material high against the sides of the sieve. At the same time the table lifts and falls (at 300 jolts per minute) over a short distance.

These two simultaneous movements ensure that each particle of material is given the optimum chance of passing through a sieve aperture.

- Heavy duty
- Floor standing
- Unique sieving action.
- Quick release clamp mechanism
- Digital timer

Specification

Electrical Supply	240V 1ph
Dimensions	320mm x 553mm x 1257mm
Weight	74kg
Sieves Sizes Accepted	14 x 200mm diameter or 7 x 300mm diameter
